01 | About the Project

02 | Parts of the Project

03 | Brief Working

04 | Conclusion

ABOUT THE PROJECT:

In this project, we create different components to help with the following functions:

- A simple system where the meetings can be booked easily
- Login for the manager/employee
- Schedules for the meetings booked
- Access to the meeting details

PARTS OF THE PROJECT:

In this project, the development was done in the following parts:

- A servlet with the functional code attached
- Front end developement which consisted of creating the UI
- A database connection

Development Cycle:

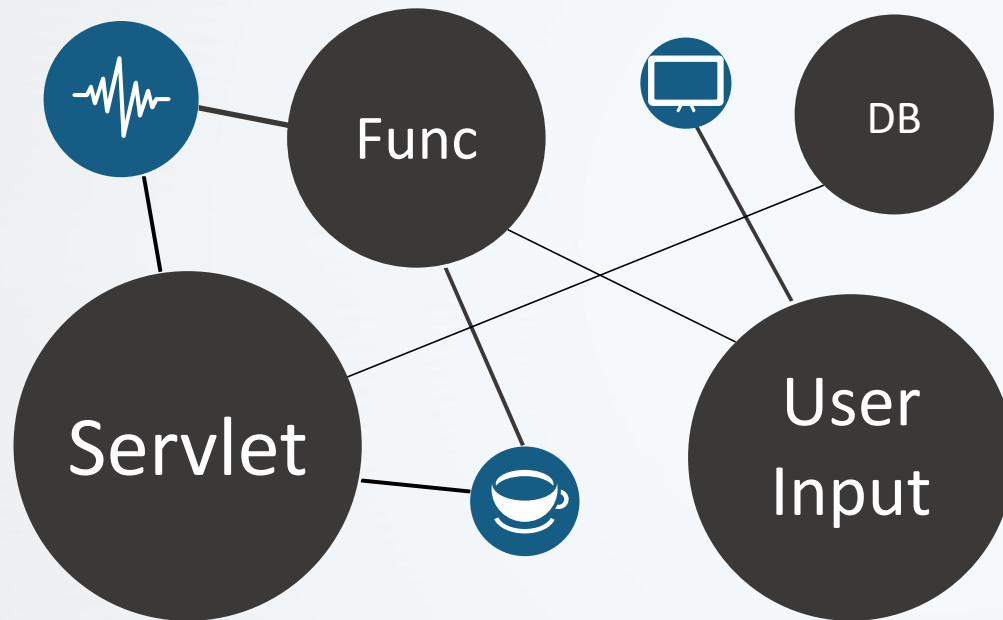

The development of the project was carried out as shown in the above flow diagram.

FUNCTIONALITY:

In this project, we create different components to help with the following functions:

- A simple system where the meetings can be booked easily
- Login for the manager/employee
- Schedules for the meetings booked
- Access to the meeting details

BRIEF WORKING:

A diagram to depict the interaction of users and the brief working of the automated meeting room booking system in ideal conditions. The methods of the code, the database, the servlet and endapplication interact with each other, leading to a successful implementation of the project.

A photograph of a long bridge spanning a body of water at sunset. The bridge is a steel truss structure, and its reflection is visible in the water. The sky is a mix of orange and blue, and the water is a deep blue. In the background, there are hills and some ships on the water. A large blue geometric shape, resembling a triangle, is overlaid on the top left corner of the image.

THANK YOU
